

Roadside Assistance Training

Roadside Assistance / Recovery Training.

A great course for service engineers or people who have to attend roadside repairs & assistance.

Our approved module based courses are run on your site by our team of approved trainers accredited by the IVR (Institute of Vehicle Recovery)

The most popular Module for our industry is VR3 Roadside Assistance Module

The VR3 Module deals with the Safety at the Roadside, the correct procedure to approach the scene and carrying out a risk assessment prior to recovering or repairing the vehicle.

Theory:

- Roles and responsibilities with regards to Safety at the Roadside
- How to approach the scene
- Risk assessment prior to Recovery at the Roadside
- Vehicle driver and passenger management and welfare
- Procedures and checks prior to leaving the scene

A Practical Skill Instruction section, which is demonstrated through role playing the skills acquired in the theory section.

Other modules are also available.
