

Vehicle Inspection & Maintenance Compliance Services

Providers of vehicle inspections and compliance monitoring to some of the UK's & Europe's largest fleet operators.

Regardless of size as a transport operator your Operator licence is the heart of your business.

The difference between believing you are compliant and knowing is the key to protecting your O licence. Whether you use your own drivers, engineering staff, vehicles or a third party the name on the O Licence is the name at risk.

Undertaking regular compliance checks on the integrity of your systems or a third parties activities is key to preventing potential liabilities such as fines, public inquiries and hefty legal bills.

Using the right people to undertake compliance checks is key. Our team of fully qualified staff have been in management roles, are qualified auditors, vehicle inspectors and understand the requirements of how to stay compliant, understand operational pressures, root cause of how maintenance issues evolve and how they multiply when they are not tackled correctly.

We do not simply identify the issue we see our customers as our partners and we provide recommendations, guidance and help you become stronger with your compliance helping you to protect and focus on growing your business with the knowledge that you are compliant.

Our independent and none bias compliance monitoring services include:

Vehicle Inspections: which include – Monitoring your inspection team, pre purchase / off hire, third party monitoring, campaign checks, build quality checks, rail support and school transport monitoring services.

Gate Checks: monitoring the quality of your driver's pre use defect checks and the management and recording of the defects identified.

Maintenance System Audits: auditing the procedures, processes and maintenance paperwork in place that helps maintain your O Licence and protect you from potential liabilities

Maintenance Paperwork Audits: auditing the integrity of your vehicle inspection, driver pre use, wheel torque book and other operations paperwork to ensure that audit trails are constant and defects / reported issues are being managed thoroughly.

Compliance is about making the right decisions. Starts with choosing the right compliance service partner. We are the only compliance provider who is appointed as the Confederation of Passenger Transport's "Compliance Partner" for the passenger transport industry.
